PROFILE

Full stack web developer and former customer service professional with passion for teamwork

PROFESSIONAL EXPERIENCE

Freelance Web Development

February 2017 –

Present

- Completed three projects (see below for an illustrative list) over the past five months.
- Focused on improving front-end development and debugging skills.

General Assembly, *Teaching Assistant*

October 2016 – January 2017

- Assistant students in Web Development Intensive Bootcamp; reviewed code and helped with homework and advanced concepts.
- Worked with two classes of approximately fifteen students each to ensure that each was meeting coursework standards and keeping up with lessons.

General Assembly, *Apprentice Developer*

July 2016 – September 2016

- Built and honed numerous skills including HTML, CSS, JS, ReactJS and Ruby on Rails. Spent at least forty hours per week practicing each skill with both in class and homework assignments, and independently.
- Completed solo and group projects that enabled a deeper understanding of the principles of programming and agile development, and a better grasp of working in a developmental team.

Rewards Network, *Title*

- Acted as retention specialist for restaurants using our marketing and loyalty programs, ensuring clients understood the value of programs and swiftly corrected any potential issues.
- Worked with over one hundred accounts of all sizes and types, from small fast-casual to large fine dining.

ILLUSTRATIVE WEB DEVELOPMENT EXPERIENCE

Google Tours - <http://www.google-tours.herokuapp.com/>

- Inspired by time spent as a walking tour guide, this app is designed to allow users to create their own, custom tours of a given area using Google Street View.
- The site is built with a Ruby on Rails backend and a ReactJS front end.

BeeHaven Bees - <http://www.beehavenbees.com>

- A custom built site for a beekeeping business that was looking to change its name and image. This site provided a wealth of experience in front end work, especially thanks to the efforts of a professional designer who shared her knowledge while finishing the site.

PC Painting - <http://www.pcpaintingandremodel.com/>

- My first true freelance project. Working on this site taught me a great deal about design and front-end development in general. It also gave me new insights into the ups and downs of working with clients.

EDUCATION

Vassar College – Poughkeepsie, New York
2013

August 2009 – May

- B.A., Science, Technology and Society
